showed that there was a significant difference between
the amino group of 3-aminocarbazole and the amino
group of the ordinary aromatic amines. 3-Aminocarba-

DESCRIPTORS: *Nervous system, *Radiotherapy,
Radiation effects.

Results are described of investigations of the nervous
system and internal organs of 73 patients (49 females
and 24 males) which had undergone radiotherapy. A
provisional hypothesis is put forward concerning the
effect of the localization of the fields of irradiation on
the frequency and degree of the postirradiation changes.
